**Practical Design of Timber Structures to Eurocode 5** By H.J. Larsen, V. Enjily

Practical Design of Timber Structures to Eurocode 5 begins with a description of timber, considering its strength, stiffness, moisture behaviour, rheology and durability, before going on to describe the production and relevant properties of materials used for timber structures. Readers will learn the theory behind the design of structural elements, such as beams, columns and walls, as well as how to ensure these structures conform to engineering design rules.
