The Science Studies Reader From Routledge

The *Reader* focuses on the practices of modern and contemporary science and technology located in different national and institutional settings, with some attention to non- Western contexts. By mapping some of the open questions and points of tension likely to occupy the field for years to come, the essays in the *Reader* cast fresh light on what "science" means at the end of the twentieth century.

Editorial Review

Review

There is no comparable anthology in which so many [science studies classics] can be accessed so conveniently... It is easy to predict a bright future for the collection as assigned reading for seminars in interdisciplinary science studies, and indeed I have already put it to use successfully in just that way. -- Jan Golinsky, *Isis*

Catalog Blurb. -- Bulletin of Science, Technology & Society

Collecting the founding articles of science studies all in one place, for the first time...*The Science Studies Reader* is essential reading for anyone interested in science and technology. There is simply nothing else like it. -- *Bulletin of Science, Technology & Society*, June 2001

About the Author

Mario Biagioli is Professor of the History of Science at Harvard University and the author of *Galileo Courtier* (1993).
