Bilingualism in Development: Language, Literacy, and Cognition By Ellen Bialystok

Bilingualism in Development describes research on the intellectual development of bilingual children, showing how it is different from that of monolingual children. The focus is on preschool children, examining how they learn language, how they acquire literacy skills, and how they develop problem-solving ability in different domains. It is unique in that it assembles a wide range of research on children's development and interprets it within an analysis of how bilingualism affects that development. It is the only book to interpret this large research from a single theoretical perspective, leading to coherent conclusions.

Editorial Review

Review

"I would enthusiastically recommend this book to any cognitive scientists interested in bilingualism, for its ability to identify important psycholinguistic mechanisms and its integration of issues across a wide range of cognitive domains. I would also recommend the book highly to neuroscientists interested in bilingual issues..."

--APA Review of Books

"Bilingualism in Development differs from, and even surpasses other books of this kind in that it assembles a wide range of research on children's language development, interprets it with analyses of how bilingualism affects that development, and, above all, breaks the myths surrounding bilingualism and bilingual education."

--Bilingual Research Journal
