Microcomputer-Based Labs: Educational Research and Standards (Nato ASI Subseries F:) From Brand: Springer

Microcomputer-based labs, the use of real-time data capture and display in teaching, give the learner new ways to explore and understand the world. As this book shows, the international effort over a quarter-century to develop and understand microcomputer-based labs (MBL) has resulted in a rich array of innovative implementations and some convincing evidence for the value of computers for learning. The book is a sampler of MBL work by an outstanding international group of scientists and educators, based on papers they presented at a seminar held as part of the NATO Special Programme on Advanced Educational Technology. The story they tell of the development of MBL offers valuable policy lessons on how to promote educational innovation. The book will be of interest to a wide range of educators and to policy makers.

Editorial Review

From the Back Cover

Microcomputer-based labs, the use of real-time data capture and display in teaching, give the learner new ways to explore and understand the world. As this book shows, the international effort over a quarter-century to develop and understand microcomputer-based labs (MBL) has resulted in a rich array of innovative implementations and some convincing evidence for the value of computers for learning. The book is a sampler of MBL work by an outstanding international group of scientists and educators, based on papers they presented at a seminar held as part of the NATO Special Programme on Advanced Educational Technology. The story they tell of the development of MBL offers valuable policy lessons on how to promote educational innovation. The book will be of interest to a wide range of educators in physics, science and information technology, and to educational policy makers.

Users Review

From reader reviews:

James Williams:

As people who live in typically the modest era should be change about what going on or details even knowledge to make these keep up with the era which can be always change and progress. Some of you maybe can update themselves by looking at books. It is a good choice to suit your needs but the problems coming to you is you don't know what one you should start with. This Microcomputer-Based Labs: Educational Research and Standards (Nato ASI Subseries F:) is our recommendation to make you keep up with the world. Why, since this book serves what you want and need in this era.

Albert Fragoso:

Information is provisions for individuals to get better life, information currently can get by anyone from everywhere. The information can be a expertise or any news even restricted. What people must be consider when those information which is inside the former life are challenging to be find than now's taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you obtain the unstable resource then you get it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Microcomputer-Based Labs: Educational Research and Standards (Nato ASI Subseries F:) as your daily resource information.

Neil McNatt:

Reading a book for being new life style in this calendar year; every people loves to go through a book. When you go through a book you can get a lots of benefit. When you read publications, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics,

and soon. The Microcomputer-Based Labs: Educational Research and Standards (Nato ASI Subseries F:) provide you with a new experience in examining a book.

Jim Molnar:

With this era which is the greater person or who has ability to do something more are more precious than other. Do you want to become certainly one of it? It is just simple way to have that. What you should do is just spending your time almost no but quite enough to possess a look at some books. On the list of books in the top collection in your reading list is usually Microcomputer-Based Labs: Educational Research and Standards (Nato ASI Subseries F:). This book which is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking upward and review this guide you can get many advantages.
