Editorial Review

Review

“This is an incredible resource for any dental practitioner – DCP and dentist alike....The book is over 500 pages in all, but it is very easy to use as a reference resource due to the fact that each chapter begins with an outline of its contents and therefore a quick scan of the first page of each chapter will direct the reader to specific information if that is what is required. On the other hand, a more leisurely read gives valuable background information to the aspects of pharmacology which we take for granted on a daily basis...Important points within the text are summarised through the use of tables and boxes which make it easier to understand...The book has a very informative appendix section including a list of the top 200 most prescribed drugs, and what they are used for.

This book is a must on every dental practitioner’s shelf – it should not be restricted to the dental hygienist!”
