## Climate Responsive Design: A Study of Buildings in Moderate and Hot Humid Climates By Richard Hyde

*Climate Responsive Design* provides a unique source for students and practising architects requiring guidance on climatic design. Covering theory and application it provides examples of innovative and best practice in 'responsive architecture' through case studies. The book also covers the broader topic of technology as a generator in design which will be of interest to all those involved in design and building. The book focuses on tropical climate but some of the theory can be applied to other climates; the difference in application is clearly delineated.

### **Editorial Review**

Review

**'Hyde shows in this book that comfortable living is entirely achievable without air conditioning in many regions by appropriate architecture design... The book is well illustrated both with photographs of successful (and some unsuccessful) buildings.'** - *The Architectural Science Review*

About the Author

Woods is affiliated with the National University of Singapore.

### **Users Review**

**From reader reviews:**

**Stan Whitley:**

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to understand everything in the world.
