Editorial Review

From the Back Cover

Master the art of wiring your network

Plan, design, and build the communication network best suited to your company's need with this essential reference. Inside, networking expert Chris Clark takes you through all the stages of wiring up your data system. Updated information on all applicable industry standards and codes makes optimizing your network simple. With complete details on both copper and fiber-optic networks, this guide covers all aspects of horizontal and backbone cabling as well as the creation and construction of support structures. Specifications for testing and troubleshooting guarantee high-speed, error-free communication.

- Select the proper transmission media for the job at hand--UTP, SCTP, STP coaxial cables, or optical fibers
- Design and install horizontal pathways, such as under floor ducts, cellular floors, conduits, ceiling distributions, and cable trays
- Terminate multiple horizontal cables using a multi-user telecommunications outlet assembly (MUTOA)
- Install proper grounding and bonding components, including TMGB, TGB, and TBBIBC
- Build a telecommunications room containing ladder and communication racks, cable-termination hardware, punch-down blocks, patch panels, and TGBs
- Implement a sound firestopping system
- Pull copper horizontal and fiber-optic cable, and handle termination and splicing for both
- Test and certify copper cables using the lineman's test set, toner generator and amplifier unit, multimeter, continuity tester, and certification field tester
- Perform attenuation, bandwidth, length, and fault location testing on fiber-optic cabling systems

About the Author

Chris Clark (Roseville, CA) is the president and founder of Intercontinental Communications and Clark Technology Group (dba Net CBT) located in Roseville, California. Both Intercontinental Communications and Clark Technology Group are consulting, design and training organisations. Chris holds both the RCDD and LAN Specialist credentials from BICSI. He is a licensed California Contractor with a C-7 license for low voltage systems. Chris is also a certified BICSI and Nordex/CDT IBDN instructor and a member of the BICSI Engineering and Methods Committee for Local Area Network and LAN cabling design.

Users Review

From reader reviews:

Lula Estes:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to find out everything in the world. Each reserve has different aim or goal; it means that guide has different type. Some people sense enjoy to spend their time for you to read a book. They are really reading whatever they consider because their hobby is usually reading a book. Why not the person who don't like looking at a book? Sometime, man or woman feel need book after they found difficult problem or perhaps exercise. Well, probably you'll have this Network Cabling Handbook (Standards & Protocols).

Jeffrey Drake:

This Network Cabling Handbook (Standards & Protocols) are usually reliable for you who want to be considered a successful person, why. The reason why of this Network Cabling Handbook (Standards & Protocols) can be one of many great books you must have is giving you more than just simple studying food but feed an individual with information that possibly will shock your before knowledge. This book is definitely handy, you can bring it everywhere you go and whenever your conditions in the e-book and printed kinds. Beside that this Network Cabling Handbook (Standards & Protocols) forcing you to have an enormous of experience for example rich vocabulary, giving you trial of critical thinking that could be useful in your day task. So , let's have it appreciate reading.

Rosa Rodriguez:

The book Network Cabling Handbook (Standards & Protocols) will bring that you the new experience of reading the book. The author style to elucidate the idea is very unique. In case you try to find new book to see, this book very appropriate to you. The book Network Cabling Handbook (Standards & Protocols) is much recommended to you to study. You can also get the e-book through the official web site, so you can more readily to read the book.

Richard Dike:

Many people spending their time period by playing outside having friends, fun activity with family or just watching TV the entire day. You can have new activity to pass your whole day by looking at a book. Ugh, think reading a book really can hard because you have to bring the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smart phone. Like Network Cabling Handbook (Standards & Protocols) which is getting the e-book version. So , why not try out this book? Let's observe.
