# Arduino Networking

*By Marco Schwartz*

**Arduino Networking** By Marco Schwartz

**Connect your projects to the Web using the Arduino Ethernet library**

## About This Book

- Learn to use the Arduino Ethernet shield and Ethernet library
- Control the Arduino projects from your computer using the Arduino Ethernet
- This is a step-by-step guide to creating Internet of Things projects using the Arduino Ethernet shield

## Who This Book Is For

This book is intended for those who want to build their own network-connected projects using the Arduino platform. You will be able to build exciting projects that connect to your local network and the Web. You will need to have some basic experience in electronics and web programming languages. You will also need to know the basics of the Arduino platform as the projects mainly deal with the networking aspects of the Arduino Ethernet shield.

## What You Will Learn

- Interface the Ethernet shield with Arduino and to your Ethernet router
- Learn the basics of the Arduino Ethernet library
- Grab the content of a web page using the Ethernet shield
- Measure data and send it to a server running on your computer
- Create a data logging station with a web server running on the Ethernet shield
- Send measured data to the cloud service Xively, so it can be monitored from anywhere
- Discover how to use the Temboo web service to connect the Ethernet shield to more cloud services

## In Detail

Arduino is a powerful electronic prototyping platform used by over one million people around the world. The Arduino Ethernet shield is the perfect addition to the Arduino platform to get it connected to your local network and to the Web in

minutes. This book covers several projects you can build using the Arduino Ethernet shield. These projects are organized in three parts. The first part of the book will cover the basics of the Ethernet shield and the Ethernet library, such as how to run an Ethernet client that sends data to a server on your computer. The second part will make the Arduino and Ethernet shield more independent by running a web server on the Arduino board. You will learn how to create, record, and visualize data using Xively service.

The last part of the book is dedicated to the topic of the Internet of Things, with projects that connect the Ethernet shield directly to the Web. You will also learn to create an account on Temboo to get access to a wide range of cloud services.

## Editorial Review

## Users Review

**From reader reviews:**

**Nicholas Hess:**

Do you among people who can't read satisfying if the sentence chained inside the straightway, hold on guys that aren't like that. This Arduino Networking book is readable simply by you who hate those perfect word style. You will find the data here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to offer to you. The writer associated with Arduino Networking content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the articles but it just different by means of it. So , do you nonetheless thinking Arduino Networking is not loveable to be your top collection reading book?

**Dave Thomas:**

Information is provisions for folks to get better life, information currently can get by anyone at everywhere. The information can be a information or any news even restricted. What people must be consider while those information which is within the former life are challenging to be find than now's taking seriously which one works to believe or which one the resource are convinced. If you have the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen inside you if you take Arduino Networking as your daily resource information.

**Kay Young:**

Reading a book to become new life style in this season; every people loves to go through a book. When you go through a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, as well as soon. The Arduino Networking will give you new experience in studying a book.

**Jamie Ault:**

It is possible to spend your free time to read this book this publication. This Arduino Networking is simple to create you can read it in the park, in the beach, train as well as soon. If you did not have got much space to bring typically the printed book, you can buy often the e-book. It is make you much easier to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
