Residential Windows: A Guide to New Technologies and Energy Performance (Third Edition) By Dariush Arasteh, John Carmody, Lisa Heschong, Stephen Selkowitz

The third edition of *Residential Windows: A Guide to New Technologies and Energy Performance* provides updated and expanded information on window properties and technologies, as well as new sections on such key topics as window installation, energy efficiency, and building codes.

For this latest edition, all of the energy performance data have been revised, based on the latest simulation techniques and industry-accepted assumptions. *Residential Windows* provides an overview of new window products for consumers, designers, and builders, as well as regulators, standards developers, utilities, and the researchers, manufacturers, and suppliers in the window industry itself. It is an essential resource for anyone considering purchasing or installing new windows. 232 illustrations

Editorial Review

Review

“[H]ow many textbooks are devoted to saving you money? This up-to-the minute reference is just that.” (My House in the Mountain States)

“Who would think a book about windows could be so entertaining, but at the same time so informative?” (Shelley Shepherd-Klaner - Today's Home Magazine San Francisco/San Mateo)

About the Author

Dariush Arasteh, who holds degrees in mechanical and civil engineering, is a staff scientist in the Windows and Daylighting Group at Lawrence Berkeley National Laboratory.

John Carmody, professor and director of the Center for Sustainable Building Research, University of Minnesota, has coauthored ten books, including Window Systems for High Performance Buildings.

Lisa Heschong is an architect, a partner of the Heschong Mahone Group, an architectural research firm, and the author of Thermal Delight in Architecture.

Stephen Selkowitz, who holds degrees in physics and environmental design, directs Windows and Daylight Research at Lawrence Berkeley National Laboratory.

Users Review

From reader reviews:

Beverly McKeever:

Have you spare time for just a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the particular Mall. How about open or maybe read a book allowed Residential Windows: A Guide to New Technologies and Energy Performance (Third Edition)? Maybe it is to get best activity for you. You realize beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with the opinion or you have different opinion?

Jared Hoskins:

Reading a e-book tends to be new life style in this particular era globalization. With reading you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can share their idea. Guides can also inspire a lot of people. Many author can inspire their reader with their story as well as their experience. Not only situation that share in the guides. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors these days always try to improve their ability in writing, they also doing some analysis before they write on their book. One of them is this Residential Windows: A Guide to New Technologies and Energy Performance (Third Edition).

Kristy Douglas:

Are you kind of active person, only have 10 as well as 15 minute in your time to upgrading your mind talent or thinking skill actually analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your limited time to read it because this all time you only find book that need more time to be examine. Residential Windows: A Guide to New Technologies and Energy Performance (Third Edition) can be your answer as it can be read by an individual who have those short free time problems.

Andrew Gillon:

Many people spending their time period by playing outside together with friends, fun activity with family or just watching TV the entire day. You can have new activity to enjoy your whole day by reading a book. Ugh, you think reading a book can actually hard because you have to bring the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Mobile phone. Like Residential Windows: A Guide to New Technologies and Energy Performance (Third Edition) which is finding the e-book version. So , why not try out this book? Let's view.
