### **Editorial Review**

#### **Review**

"David P. Billington is clearly moved by great structures--he means it when he says that major works of structural engineering are like the art of poetry, while architecture is the art of prose. . . . This is a book on structural engineering that sees its subject as part of the larger drama of history and culture, and for the breadth of this stance alone, it is impressive."--*New York Times Book Review*
