**Animals in Space: From Research Rockets to the Space Shuttle (Springer Praxis Books)** By Colin Burgess, Chris Dubbs

This book is as a detailed, but highly readable and balanced account of the history of animal space flights carried out by all nations, but principally the United States and the Soviet Union. It explores the ways in which animal high-altitude and space flight research impacted on space flight biomedicine and technology, and how the results - both successful and disappointing - allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence. This complete and authoritative book will undoubtedly become the ultimate authority on animal space flights.

## **Editorial Review**

### **Review**

From the reviews:

"Animals in Space, a relentlessly factual account of animal endeavours in near Earth orbit. ... The programme and its relationship to animal rights is surely fertile material for any future popular science work on the subject. ... the history of animal space flight is long and fascinating. It deserves its place alongside the human stories of Vostok 1, Apollo 11 and Challenger." (New Scientist, April, 2007)

"Animals in Space is an extremely detailed, yet absorbing, history of animals used in the space programs around the world. ... In addition to a list of references at the end of each chapter, the book's documentation includes photos, charts, and lists of the U.S., Soviet, Chinese, French and international space missions (including Bion and International Space Station) that utilized animals as test and research subjects. ... the book will surely serve as a standard on the subject for years to come." (Advocacy for Animals, November, 2007)

### **About the Author**

Colin Burgess is a recognised historian in the field of space literature and has carried out extensive research on the history of animal space flights over many years. Chris Dubbs also carried out comprehensive research on Soviet animal flights. He was selected by the New Mexico Museum of Space History to serve as Guest Curator for their upcoming exhibit on the Soviet space dogs.

## **Users Review**

### **From reader reviews:**

#### **Adriana Cornell:**

What do you in relation to book? It is not important with you? Or just adding material if you want something to explain what you problem? How about your extra time? Or are you busy person? If you don't have spare time to do others business, it is make you feel bored faster. And you have free time? What did you do? Every individual has many questions above. They have to answer that question because just their can do this. It said that about reserve. Book is familiar on every person. Yes, it is proper. Because start from on guardería until university need this kind of Animals in Space: From Research Rockets to the Space Shuttle (Springer Praxis Books) to read.

#### **Rosa Rodriguez:**
