CCDP Self-Study: Designing Cisco Network Architectures (ARCH) (Self-Study Guide) By Amir Ranjbar, Keith T. Hutton

Cisco authorized self-study book for CCDP® 642-871 architectures foundation learning

Prepare for the CCDP ARCH exam 642-871 with the Cisco authorized self-study guide. This book teaches you how to:

- Understand the composition and deployment of the Cisco AVVID framework in network design
- Understand the composition and role of the Enterprise Composite Network Model in enterprise network design
- Design enterprise campus networks and their edge network connectivity to the Internet
- Understand and implement network management solutions in the network
- Integrate new technologies designed to enhance network performance and availability in the enterprise, such as high availability, QoS, multicasting, and storage and content networking
- Design and implement appropriate security solutions for enterprise networks
- Deploy wireless technologies within the enterprise
- Implement and design IP telephony solutions for the enterprise network

CCDP Self-Study: Designing Cisco Network Architectures (ARCH) is a Cisco® authorized self-paced learning tool. By presenting a structured format for the conceptual and intermediate design of AVVID network infrastructures, this book teaches you how to design solutions that scale from small to large enterprise networks and take advantage of the latest technologies. Whether you are preparing for the CCDP® certification or simply want to gain a better understanding of how to architect network solutions over intelligent network services to achieve effective performance, scalability, and availability, you will benefit from the foundation information presented in this book.

This comprehensive book provides detailed information and easy-to-grasp tutorials on a broad range of topics related to architecture and design, including security, fine-tuning routing protocols, switching structures, and IP multicasting.

To keep pace with the Cisco technological developments and new product offerings, this study guide includes coverage of wireless networking, the SAFE Blueprint, content networking, storage networking, quality of service (QoS), IP telephony, network management, and high availability networks. Design examples and sample verification output demonstrate implementation techniques. Configuration exercises, which appear in every chapter, provide a practical review of key concepts to discuss critical issues surrounding network operation. Chapter-ending review questions illustrate and help solidify the concepts presented in this book.

CCDP Self-Study: Designing Cisco Network Architectures (ARCH) is part of a recommended learning path from Cisco Systems® that includes simulation and hands-on training from authorized Cisco Learning Partners and self-study products from Cisco Press. To find out more about instructor-led training, e-learning, and hands-on instruction offered by authorized Cisco Learning Partners worldwide, please visit www.cisco.com/go/authorizedtraining.

This volume is in the Certification Self-Study Series offered by Cisco Press®. Books in this series provide officially developed training solutions to help networking professionals understand technology implementations and prepare for the Cisco Career Certifications examinations.

Editorial Review

About the Author

Keith Hutton is a senior Cisco network administrator with Magma Communications Ltd., Canada's leading, full-service Internet company. Prior to joining Magma, Keith worked as a certified Cisco Systems instructor with Global Knowledge Canada. He currently holds the CCNP® and CCDP certifications.

Amir Ranjbar, CCIE® No. 8669, is a senior network architect at Global Knowledge and is a certified Cisco Systems instructor. Amir is author of the CCNP CIT Exam Certification Guide, published by Cisco Press.

Users Review

From reader reviews:

Archie Moriarty:

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each guide has different aim or even goal; it means that reserve has different type. Some people sense enjoy to spend their time for you to read a book. These are reading whatever they get because their hobby is actually reading a book. How about the person who don't like reading a book? Sometime, person feel need book if they found difficult problem or maybe exercise. Well, probably you should have this CCDP Self-Study: Designing Cisco Network Architectures (ARCH) (Self-Study Guide).

Sandy Gonsalves:

The book untitled CCDP Self-Study: Designing Cisco Network Architectures (ARCH) (Self-Study Guide) contain a lot of information on the item. The writer explains her idea with easy method. The language is very straightforward all the people, so do certainly not worry, you can easy to read this. The book was authored by famous author. The author provides you in the new time of literary works. It is easy to read this book because you can please read on your smart phone, or gadget, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and order it. Have a nice read.

Joni Harris:

This CCDP Self-Study: Designing Cisco Network Architectures (ARCH) (Self-Study Guide) is brand-new way for you who has intense curiosity to look for some information since it relief your hunger associated with. Getting deeper you on it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this CCDP Self-Study: Designing Cisco Network Architectures (ARCH) (Self-Study Guide) can be the light food for you personally because the information inside this particular book is easy to get simply by anyone. These books develop itself in the form which is reachable by anyone, that's

why I mean in the e-book form. People who think that in e-book form make them feel sleepy even dizzy this reserve is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for a person. So , don't miss the idea! Just read this e-book style for your better life and knowledge.

Eun Christensen:

As a student exactly feel bored to reading. If their teacher inquired them to go to the library as well as to make summary for some guide, they are complained. Just very little students that has reading's soul or real their interest. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring and can't see colorful photos on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this CCDP Self-Study: Designing Cisco Network Architectures (ARCH) (Self-Study Guide) can make you really feel more interested to read.
