**Construction in Cold Regions: A Guide for Planners, Engineers, Contractors, and Managers** By Terry T. McFadden, F. Lawrence Bennett

Written as a reference on effective engineering practice for construction activities in Arctic and Sub-Arctic regions. It is based on many sources around the world including the Soviet Union and China where people live and work in very low temperatures. Provides a broad look at overall problems found by engineers, contractors and builders, including case histories that illustrate actual projects throughout the cold regions of the world.
