## The Eye: The Physiology of Human Perception (Human Body (Rosen Educational Publishing)) From Rosen Education Service

The human eye has been the subject of endless fascination. Indeed, the very nature of sensory perception is shaped by the visual cues the brain receives, thus rendering the eye one of the most crucial elements in our comprehension of the world. The structures and functions of the eye are examined in this exhaustive volume that describes how we are able to process what we observe and react accordingly. Detailed diagrams accompany the text and encourage the reader to consider all aspects of this beautiful and complex area of human anatomy.
