VHDL-2008: Just the New Stuff (Systems on Silicon)

By Peter J. Ashenden, Jim Lewis

VHDL-2008: Just the New Stuff (Systems on Silicon) By Peter J. Ashenden, Jim Lewis

VHDL-2008: Just the New Stuff, as its title says, introduces the new features added to the latest revision of the IEEE standard for the VHDL hardware description language. Written by the Chair and Technical Editor of the IEEE working group, the book is an authoritative guide to how the new features work and how to use them to improve design productivity. It will be invaluable for early adopters of the new language version, for tool implementers, and for those just curious about where VHDL is headed.

* First in the market describing the new features of VHDL 2008;
* Just the new features, so existing users and implementers can focus on what's new;
* Helps readers to learn the new features soon, rather than waiting for new editions of complete VHDL reference books.
* Authoritative, written by experts in the area;
* Tutorial style, making it more accessible than the VHDL Standard Language Reference Manual.

Editorial Review

About the Author

Peter J. Ashenden received his B.Sc.(Hons) and Ph.D. from the University of Adelaide, Australia. He was previously a senior lecturer in computer science and is now a Visiting Research Fellow at the University of Adelaide. His research interests are computer organization and electronic design automation. Dr. Ashenden is also an independent consultant specializing in electronic design automation (EDA). He is actively involved in IEEE working groups developing VHDL standards, is the author of *The Designer's Guide to VHDL* and *The Student's Guide to VHDL* and co-editor of the Morgan Kaufmann series, Systems on Silicon. He is a senior member of the IEEE and a member of the ACM.

Users Review

From reader reviews:

Richard Dutton:

Reading a reserve tends to be new life style within this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Using book everyone in this world could share their idea. Books can also inspire a lot of people. Plenty of author can inspire all their reader with their story or even their experience. Not only the story that share in the textbooks. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on this planet always try to improve their talent in writing, they also doing some exploration before they write with their book. One of them is this VHDL-2008: Just the New Stuff (Systems on Silicon).

Bonnie Camacho:

Does one one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you find out the inside because don't evaluate book by its cover may doesn't work here is difficult job because you are afraid that the inside maybe not because fantastic as in the outside search likes. Maybe you answer can be VHDL-2008: Just the New Stuff (Systems on Silicon) why because the fantastic cover that make you consider about the content will not disappoint you. The inside or content is usually fantastic as the outside or even cover. Your reading 6th sense will directly assist you to pick up this book.

Allen Grimm:

It is possible to spend your free time to learn this book this reserve. This VHDL-2008: Just the New Stuff (Systems on Silicon) is simple to create you can read it in the park your car, in the beach, train and soon. If you did not include much space to bring the actual printed book, you can buy the particular e-book. It is make you simpler to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Homer Holmes:

Do you like reading a reserve? Confuse to looking for your best book? Or your book was rare? Why so many question for the book? But any kind of people feel that they enjoy to get reading. Some people likes reading through, not only science book and also novel and VHDL-2008: Just the New Stuff (Systems on Silicon) or maybe others sources were given understanding for you. After you know how the great a book, you feel wish to read more and more. Science reserve was created for teacher or perhaps students especially. Those ebooks are helping them to include their knowledge. In additional case, beside science book, any other book likes VHDL-2008: Just the New Stuff (Systems on Silicon) to make your spare time considerably more colorful. Many types of book like this one.
