### 50 Things To See With A Small Telescope By John A Read

Revised in 2016 and translated into ten languages, *50 Things to See with a Small Telescope* explores the planets, stars, galaxies and nebulae observed at stargazing events around the globe. The book includes easy to follow star maps and eclipse charts updated through the year 2030. With the "Telescope View" feature, you will see how objects appear when viewed through a small telescope. If you are having trouble enjoying your small telescope, this book is for you.

Here are some of the other objects this book will help you explore:

- Globular Clusters
- Asteroids Ceres and Vesta
- Comets
- The International Space Station
- Iridium Flares

I am very excited to share my knowledge of astronomy and I am sure you will enjoy this book for years to come.

### Editorial Review

#### Review

This delightful book covers the 50 things to see and some of them are: 'North Star, Venus, Orion Nebula, Mars, Jupiter, The Milky Way, Comets, the International Space Station, and even birds'. Just a fascinating read for me which I will go back and refer to after my telescope is purchased. At the end of the book there are schedules for total solar eclipses and Constellation maps for the Northern Hemisphere. I would say that this is an excellent as well as educational book for all ages! - *Top 500 Amazon Reviewer*
