**Analysis of Wildlife Radio-Tracking Data** By Gary C. White, Robert A. Garrott

With the substantial advances in the miniaturization of electronic components, wildlife biologists now routinely monitor the movements of free-ranging animals with radio-tracking devices. This book explicates the many analytical techniques and computer programs available to extract biological information from the radio tracking data.

- Presentation of software programs for solving specific problems
- Design of radio-tracking studies
- Mechanics of data collection
- Estimation of position by triangulation
- Graphic presentation of animal migration, dispersal, fidelity, and association
- Home range estimation, habitat utilization, and estimation of survival rates and population size

## **Editorial Review**

### **Review**

"This book will be a welcome reference in the library of those wildlife professionals involved in studies employing the use of radio-telemetry... Most biologists/scientists will find this a very easy book to read and understand, and an excellent reference to have on hand. White and Garrott have pulled together into one book the majority of the analyses techniques for radio-tracking data in use today, and in so doing have provided a valuable contribution to the wildlife profession." --**WILDLIFE REVIEW**

### **From the Back Cover**

With the substantial advances in the miniaturization of electronic components, wildlife biologist now routinely monitor the movements of free-ranging animals with radio-tracking devices. This book explicates the many analytical techniques and computer programs available to extract biological information from the radio-tracking data. For students and researchers interested in the analysis of wildlife biotelemetry, this up-to-date volume features the following:

- \* Presentation of software programs for solving specific problems
- \* Design of radio-tracking studies
- \* Mechanics of data collection
- \* Estimation of position by triangulation
- \* Graphic presentation of animal migration, dispersal, fidelity, and association
- \* Home range estimation, habitat utilization, and estimation of survival rates and population size

## **Users Review**

### **From reader reviews:**

#### **Susan Roundy:**

Have you spare time for a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to the actual Mall. How about open as well as read a book called Analysis of Wildlife Radio-Tracking Data? Maybe it is to be best activity for you. You recognize beside you can spend your time together with your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

#### **Mary Partee:**

What do you in relation to book? It is not important with you? Or just adding material when you really need something to explain what the one you have problem? How about your time? Or are you busy person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everybody has many questions above. They have to answer that question since just their can do in which. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on kindergarten until university need this specific Analysis of Wildlife Radio-Tracking Data to read.

**Alan Sours:**

Information is provisions for people to get better life, information these days can get by anyone with everywhere. The information can be a expertise or any news even an issue. What people must be consider if those information which is inside former life are difficult to be find than now's taking seriously which one would work to believe or which one the resource are convinced. If you obtain the unstable resource then you buy it as your main information we will see huge disadvantage for you. All those possibilities will not happen inside you if you take Analysis of Wildlife Radio-Tracking Data as the daily resource information.

**Gary Wilson:**

Reading a publication tends to be new life style with this era globalization. With reading you can get a lot of information that will give you benefit in your life. With book everyone in this world may share their idea. Books can also inspire a lot of people. Many author can inspire their particular reader with their story as well as their experience. Not only the storyplot that share in the books. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors nowadays always try to improve their expertise in writing, they also doing some study before they write to the book. One of them is this Analysis of Wildlife Radio-Tracking Data.
