## **Monetary Economies of Production: Banking and Financial Circuits and the Role of the State** By Louis-Philippe Rochon, Mario Seccareccia

The central focus of this book is the relationship between money, the sphere of production, and the State.

It explores how best to adapt the fundamental ideas of the circulationist perspective to achieve a better understanding of the financialisation of the production processes within contemporary capitalist economies. Importantly, the expert contributors illustrate that the true challenge ahead is to address how these new emerging forms can be eventually tamed, a challenge that the recent financial crisis has forcefully proven essential.

This book will prove an illuminating read for scholars and researchers in the heterodox economics domain.

**Contributors:** R. Bellofiore, H. Bougrine, V. Chick, M. Cingolani, E. Correa, S. Dow, T. Ferguson, M. Forstater, A. Girón, C. Gnos, R. Johnson, M. Lavoie, W.C. Marshall, E. Nell, L.-P. Rochon, M. Seccareccia, J. Smithin, B. Vallageas, G. Vidal, L.R. Wray
