"[L]ibrary and information science departments should adopt *Seeking Meaning* (2nd edition) as a textbook for educating a new generation of reference librarians. Experienced reference librarians should read it for their professional development. Owners of the first edition should consider purchasing the second for its expanded elaboration of the information search model. Librarians who teach bibliographic instruction and/or research methods should incorporate its findings into their curriculum." - **The Australian Library Journal**

"If anything the Information Search Process [ISP] model is gaining more currency, making this second edition a timely updating. . . . It is certain that the second edition is replacing the first edition on the shelves of universities and colleges.
