**Textbook of Interventional Cardiology** By Eric J. Topol, Joseph J. Jacobs

The 4th Edition of this respected resource provides comprehensive, detailed, up-to-date, and clinically oriented coverage of all aspects of percutaneous coronary revascularization. More than 68 leaders in the field offer practical, evidence-based guidance on treating a full range of coronary lesions. They discuss the very latest techniques, devices, and adjunctive therapies, and offer critical appraisals of emerging therapeutic approaches.

- Offer in-depth discussions of drug-coated stents?one of the most high profile and advanced techniques in the field.
- Presents brand-new information on inflammation and arterial injury
- angiogenesis
- percutaneous bypass surgery
- device genomics
- hypertrophic cardiomyopathy
- stem cell therapy for ischemic heart disease
- prophylactic aspirin use
- detection of vulnerable plaque
- and much more.
- Explores the amplified impact of non-coronary interventions.
- Examines improvements in adjunctive pharmacotherapy.
- Offers up-to-date information on congenital heart disease as well as restenosis.
- Features a fully revised section on outcome effectiveness in interventional cardiology.

## **Editorial Review**

### **Review**

REVIEW OF THE LAST EDITION: "The practitioner will benefit from the scientifically rigorous approach to clinical decision making consistently applied and from the useful insights into clinical interventional practice provided by leaders in the field...Dr. Topol is to be congratulated for producing a masterful text that should be of major interest to a much broader medical audience than its title might suggest." -JAMA

## **Users Review**

### **From reader reviews:**

#### **Thomas Berg:**
