**Group Theory and Chemistry (Dover Books on Chemistry)** By David M. Bishop

Group theoretical principles are an integral part of modern chemistry. Not only do they help account for a wide variety of chemical phenomena, they simplify quantum chemical calculations. Indeed, knowledge of their application to chemical problems is essential for students of chemistry. This complete, self-contained study, written for advanced undergraduate-level and graduate-level chemistry students, clearly and concisely introduces the subject of group theory and demonstrates its application to chemical problems.

To assist chemistry students with the mathematics involved, Professor Bishop has included the relevant mathematics in some detail in appendixes to each chapter. The book can then be read either as an introduction, dealing with general concepts (ignoring the appendixes), or a fairly comprehensive description of the subject (including the appendixes). In any case, the author assures students that "the mathematics involved in actually applying, as opposed to deriving, group theoretical formulae is quite trivial. It involves little more than adding and multiplying."

## **Editorial Review**

### **Users Review**

#### **From reader reviews:**

##### **Paul Flynn:**

Book is to be different for each and every grade. Book for children until adult are different content. As it is known to us that book is very important for all of us. The book Group Theory and Chemistry (Dover Books on Chemistry) ended up being making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The publication Group Theory and Chemistry (Dover Books on Chemistry) is not only giving you far more new information but also to get your friend when you sense bored. You can spend your current spend time to read your guide. Try to make relationship with the book Group Theory and Chemistry (Dover Books on Chemistry). You never truly feel lose out for everything when you read some books.

##### **Lynn Kelley:**

Reading a guide can be one of a lot of pastime that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new data. When you read a book you will get new information because book is one of various ways to share the information or maybe their idea. Second, studying a book will make an individual more imaginative. When you studying a book especially hype book the author will bring someone to imagine the story how the personas do it anything. Third, it is possible to share your knowledge to some others. When you read this Group Theory and Chemistry (Dover Books on Chemistry), you can tells your family, friends in addition to soon about yours publication. Your knowledge can inspire average, make them reading a publication.

##### **Cheryl Reese:**

Many people spending their time frame by playing outside along with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to shell out your whole day by reading a book. Ugh, ya think reading a book really can hard because you have to bring the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Cell phone. Like Group Theory and Chemistry (Dover Books on Chemistry) which is keeping the e-book version. So , why not try out this book? Let's view.

##### **Kerry Giles:**

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or even make summary for some e-book, they are complained. Just minor students that has reading's spirit or real their passion. They just do what the instructor want, like asked to the library. They go to at this time

there but nothing reading critically. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Group Theory and Chemistry (Dover Books on Chemistry) can make you feel more interested to read.
